
Next gen extensible points-of-service with Flooid Design Manager

Take full ownership of your customer-facing experience

Built directly into Flooid's next-generation extensible point-of-service platform, Design Manager gives retailers the power to brand, theme, and personalize every shopper interaction with speed and confidence - without the cost, complexity, or delays of traditional custom development.

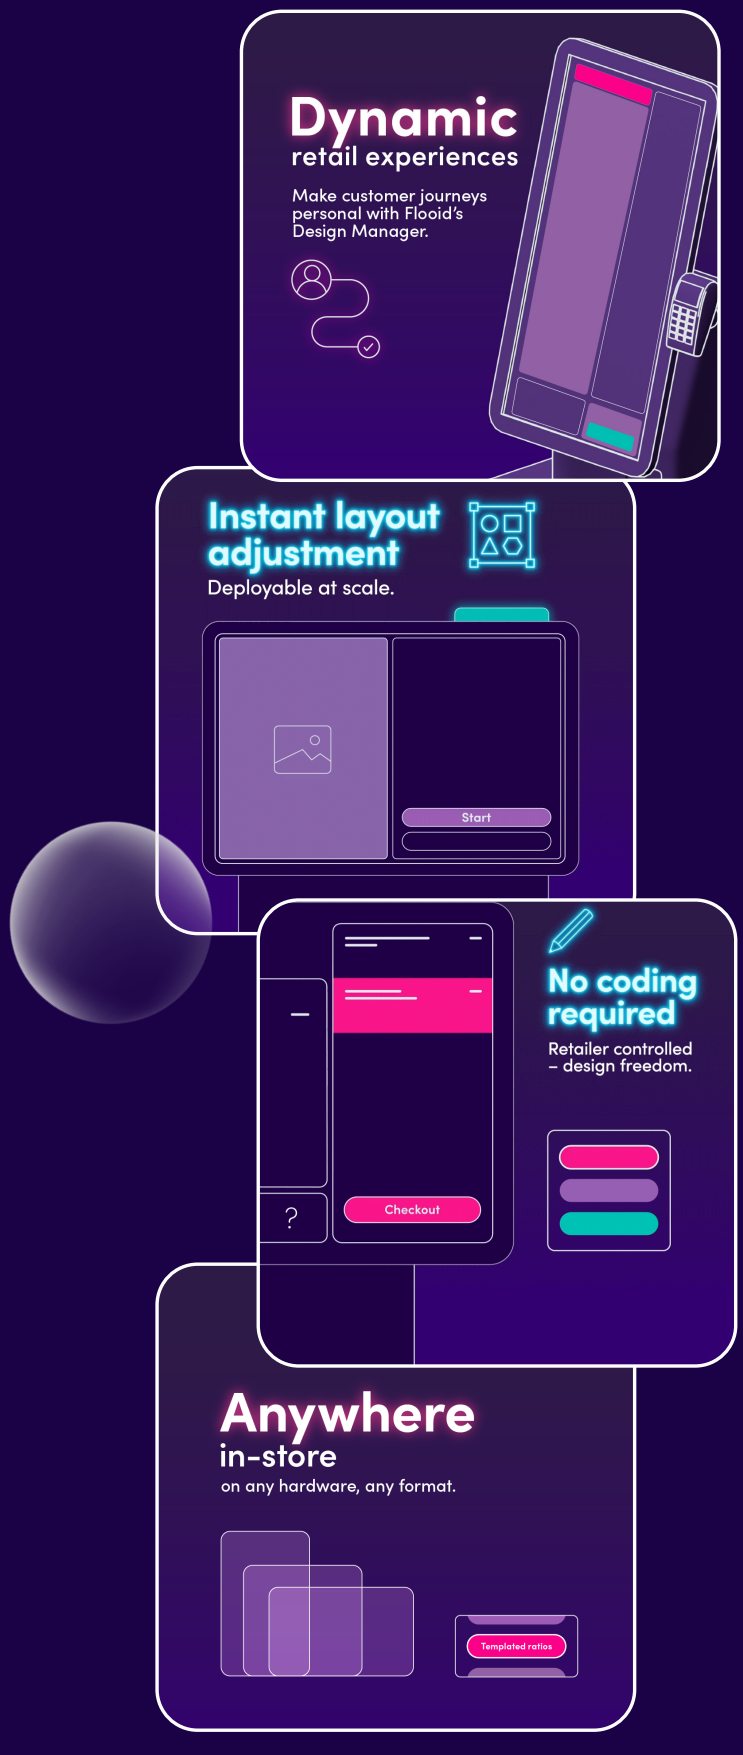
Retail moves fast. Your POS and SCO screens need to keep pace with evolving business requirements, new hardware, and changing accessibility standards.

Our extensible framework lets you:

- **React quickly** — Prepare UI changes fast and cost-effectively
- **Support any hardware** — Responsive design templates accommodate multiple screen sizes, aspect ratios, and device generations
- **Meet accessibility goals** — Built with latest accessibility compliance considerations
- **Own your brand** — Tailor screens to reflect your identity and unique shopping journeys

flooid
a GLORY company

The platform assembles independent web applications (Micro Front-Ends) that interact seamlessly with Flooid's Unified Commerce Platform. You choose from purpose-built templates, then add, move, or replace screen components - marketing panels, product information, weigh scales, action buttons – all within a flexible grid.



Modern technology.

Retailer control.

A tailored experience that evolves with your business.
