Delivering ahead of schedule for Hudson

Hudson shaved five months off new POS deployment with Flooid — mid-pandemic.

"We were already on a very demanding timeline to implement the system across more than 2,000 points of sale in the U.S. and Canada when the pandemic caught us. But we looked beyond the crisis and took advantage of it. Now we are going to finish ahead of time with a full deployment across all of our operations by the end of October. That will be 10 months from when we completed our pilot at the end of last year. We were expecting it to take closer to 15 months at best."

"Due to the pandemic, we couldn't get people in the same room to be safely trained. Working with the Flooid team, we were able to digitize the delivery of the software and the installation and implementation of the software, as well as to create learning solutions so that we could take 90% of the training online."
