

**A practical path
to resilience for
Australian
retailers**

flooid
a **GLORY** company

Build a unified resilience and security strategy:

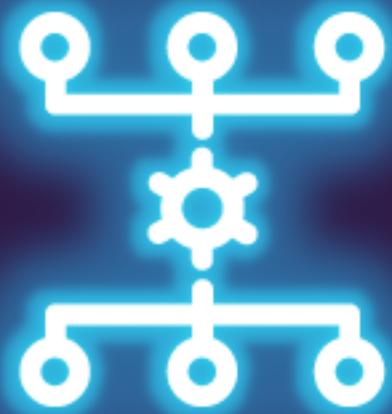

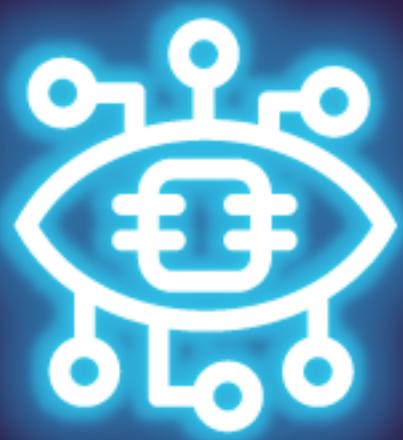

Physical security, cyber security, and operational continuity must work together. Flooid helps retailers unify these layers into a single approach.

The Brush-Tailed Rock-Wallaby remains a symbol of resilience. It is a true Queenslander: resilient, resourceful and uniquely adapted to the rugged landscape.

Implement multi-layered loss prevention:

Shrinkage prevention is strongest when computer vision, sensors, RFID, analytics, and rules-based logic support associates without adding friction for shoppers.

The multi-layered Platypus is considered to be a biological 'oddball' because it possesses a combination of traits typically found in different classes of animals.

Strengthen operational continuity across all stores:

Flooid POS can continue transacting during outages, giving retailers revenue protection and customer service reliability even in high volume environments.

The Koala's thick, woolly fur protects them from the extremes of both high and low temperatures, and also acts like a 'raincoat' to repel moisture when it rains.

Use real time insights to detect patterns and reduce shrink:

Flooid's data helps retailers identify anomalies, understand regional trends, and tailor loss prevention to each store's risk level.

While generally shy and territorial, Wombats are intelligent and curious driving them to explore their surroundings, making them engaging subjects for wildlife enthusiasts.

Empower staff with predictable processes and reliable tools:

Resilience is a combination of technology and people working together. Flooid supports both, improving confidence, consistency, and response readiness.

Cassowaries are highly dangerous if threatened, using powerful legs and a 12cm dagger-like inner claw to deliver lethal kicks, having caused human fatalities.
