

Flooid Fiscal Gateway

Expand faster. Stay compliant. Reduce risk.

International growth is notably challenging when fiscal compliance becomes a market-entry barrier.

Across fiscal markets, retailers face mandatory requirements for digital signatures, real-time reporting, legal archiving, and rapid response to regulatory change. Getting it wrong can mean fines, disruption, delayed rollout, or store closure.

Flooid's flexible fiscal gateway helps retailers remove that friction. It provides a modern fiscal compliance layer that works with Flooid's Point of Service portfolio - so retailers can enter new markets faster, stay compliant, and protect trading operations.

Compliance should not slow growth

Fiscalisation is not a local IT issue. It is a direct commercial challenge.

Retailers expanding internationally need to manage:

- Country-specific compliance rules
- Real-time or near-real-time reporting
- Long-term legal record retention
- Complex local hardware models
- Regulatory change dynamics

Building this market by market inside the POS stack is slow, costly, and tough to scale.

A smarter model for fiscal compliance: Flooid separates fiscal compliance from core POS logic. Providing retailers a cleaner, more scalable way to support regulated markets - without overloading store systems or slowing down innovation.

Core capabilities:

Digital signature

Legally secures transactions

Live reporting

Sends data to government systems

Legal archiving

Retains records for the required period

Automatic updates

Keeps pace with changing regulations

Specialist partner integration

Combines Flooid retail capability with in-country fiscal expertise

Enabling you to:

Move faster

Enter fiscal markets with less complexity and fewer delivery bottlenecks

Reduce risk

Lower exposure to compliance gaps, fines, and operational disruption

Protect your roadmap

Keep core retail innovation separate from local fiscal change

Support trading continuity

Apply compliance updates with less impact on front-line operations

Built for international retail growth and secure by design

- Role-based access
- Two-factor authentication
- Clear system-of-record boundaries
- Monitored and managed operations

Modern architecture

- Dedicated fiscal compliance layer
- Separation from business logic
- Scalable integration methods
- Support for multiple country models

Flooid Fiscal Gateway removes compliance as a barrier to growth - helping retailers expand faster, stay compliant, and trade with confidence.

Expert support with the Fiscal partner of your choice

- Proven compliance experience
- Access to specialist knowledge
- Global reach
- Best-of-breed partner model

Flooid Fiscal Gateway helps retailers turn fiscal compliance from a delivery problem into a growth enabler. Ideal for retailers that want to:

- Expand into fiscal markets with no barrier of entry
- Reduce reliance on bespoke local integrations and lower operational complexity
- Remove compliance from the critical path to growth with confidence
- Scale internationally with less risk and easier adaptation as regulations evolve
