

Break free from partner lock-in

Tired of feeling trapped by your payment provider, where switching feels like a nightmare of costs, complexity, and disruption?

With Flooid's **Payment Gateway (FPG)**, you're in control. Our **payment provider-agnostic platform** gives you the freedom to choose the partners that best fit your business, without being tied down.

Powered by a **fully managed, cloud-native solution**, FPG connects you to multiple providers through a single, seamless integration. You get instant access to a wide range of payment use cases, plus continuous innovation with **new features already on our roadmap**, helping you stay ahead of competitors, meet changing customer expectations and easier expansion into new channels.

More choice. Less complexity. Total flexibility.

Choose flexibility.
Choose innovation.
Choose Flooid.

- Role based access control and optional Two-Factor Authentication (2FA)
- Centralised configuration of payment providers within the Gateway
- POS and Gateway never handle raw card data
- All authorisers are PCI compliant
- Only tokenised or masked data is exchanged, reducing PCI scope
- Architecturally designed for modularity and scalability

flooid
a **GLORY** company

Choose your provider and have their solution integrated in weeks, not months

Utilising modern composable and extensible architecture, Flooid's Payment Gateway decouples legacy technology, resulting in a simplified implementation, testing and certification processes. Evolving to a SaaS offering, we can significantly reduce the cost of change moving previous capital expenditure into a predictable, subscription-based pricing. Flooid Payment Gateway remains outside the scope of PCI Compliance, so you can benefit from reduced overhead and regulatory compliance burden.

Functionality overview

- Credit/debit
